

The Agentic AI & Gig-Economy Ops Blueprint

PREPARED FOR

UniUni Logistics

ARCHITECT

Bhrigu Aneja

FOCUS AREA

Last-Mile Autonomy

01 The Objective

Scale from 200k daily parcels to
Million-Scale Autonomy.

UniUni has mastered the variable-cost gig model. The next leap is an Autonomous Orchestration Layer that manages 40k+ drivers.

02 Pillars of Transformation

DYNAMIC FLEET INTELLIGENCE

Agentic dispatchers that re-negotiate routes with drivers in real-time.

ROBOTIC SORTATION MESH

Unifying GRS robotic telemetry with the driver-app data layer.

AUTONOMOUS COMPLIANCE

LLM-agents automating US-to-Canada customs documentation.
